

**AMERICA'S #1
MUZZLELOADING BULLET**

RECOMMENDED GAME LOADS

**THE BULLETS THAT MAKE SABOTS OBSOLETE
LOAD FASTER, SHOOT CLEANER AND HIT HARDER.**

Based on our ballistic information and in-field performance, below are the recommended PowerBelt Bullet options for various big game animals. Powder charges will run from 80 to 150 grains of powder depending on the rifle used and type of powder. If most of your shots are 120 yards or less, then 80 to 100 grains of powder is all that is needed. If your shots

are going to be from 120 to 200 yards, then we recommend using a magnum charge of 110 to 150 grains, which should ONLY be used in MAGNUM capable rifles Anything over 100 grains of powder is considered to be a MAGNUM charge. Check with your rifle manufacturer to confirm what loads they recommend for the safe use of your rifle.
